

ABOUT AVIRAL

I am a Developer Analyst at Accenture with a focused expertise in Generative AI, working with advanced tools such as LLM, ChatGPT, Azure, and web scraping. Over the past year, I have dedicated my role as a Gen AI Engineer to developing and implementing AI-driven solutions, enhancing efficiencies, and providing innovative insights. My current endeavors include practicing various machine learning algorithms and applying data analytics to derive meaningful insights, showcasing my continuous commitment to professional growth and technical proficiency.

My journey in technology was marked by a significant achievement in 2019 when my team won the Smart India Hackathon (SIH-2019). We developed an Automated Drone Enabled Construction Monitoring System, utilizing Python libraries and ortho-mosaicing techniques, demonstrating our ability to integrate cutting-edge technology with practical applications.

In addition to my professional responsibilities, I am passionate about learning and self-improvement. I often find myself engrossed in writing scripts or exploring new knowledge online. My technical skill set includes intermediate proficiency in Object-Oriented Programming (OOP), Python, Machine Learning, Data Analysis, SQL, Generative AI, and Statistical Modeling.

When I am not immersed in work or learning, I value meditation and spending time with friends. My diverse interests and continuous learning drive me to stay ahead in the ever-evolving field of technology. There are two things I am always up for : A cup of Coffee and Conversation.
